The Coordinator General

OIC-COMSTECH Secretariat
33-Constitution Avenue, G-5/2
Islamabad, Pakistan

Dear Sir/Madam,

**SUBJECT: APPLICATION FOR OIC-COMSTECH EXPERT SERVICES LINKAGE
PROGRAM**

I am writing to formally submit my application for the OIC-COMSTECH Expert Services program to facilitate institutional development and high-level capacity building in the critical domains of Space Diplomacy, Space Policy, and International Space Law at my institution.

As a graduate of International Relations from Bayero University Kano, my academic research and long-term career ambitions are deeply focused on space governance and the emerging global space economy. Over the past few years, I have actively published and presented research papers at international conferences, including within the Department of Public Administration at Bayero University Kano and the Department of Political Science at the Federal University Dutsin-Ma. Furthermore, my active engagement as a member of the Space Generation Advisory Council (SGAC) has reinforced my commitment to expanding space development initiatives within the Global South.

There is currently a profound strategic gap in navigating the legal and economic architecture of outer space activities within developing nations, particularly among Islamic states. While commercial and technological advancements in outer space accelerate, the capacity to formulate sovereign space policies and negotiate multilateral frameworks remains limited. Hosting a visiting expert through COMSTECH will provide our department with the vital technical guidance needed to build localized policy repositories, design advanced simulation methodologies, and establish robust space law modules within our curriculum.

This engagement is central to our goal of building a sustainable talent pipeline and transforming our institution into a regional hub for space diplomacy. I am fully prepared to ensure all necessary logistical arrangements, including accommodation and local transport, are perfectly coordinated to maximize the impact of the expert's stay.

Thank you for your time, consideration, and ongoing dedication to advancing scientific and collaborative excellence across OIC member states.

Yours faithfully,

Khalid Yusuf Aminu

International Relations Researcher

Kano, Nigeria
